Middlesex University, UK

Rob White  
Professor  
University of Tasmania  
Australia

Melissa Jarrell  
Associate Professor of Criminal Justice  
Texas A&M University, Corpus Christi  
USA

Criminologists have increasingly become involved and interested in environmental issues to the extent that the term Green Criminology is now recognised as a distinct subgenre of criminology. Within this unique area of scholarly activity, researchers consider not just harms to the environment, but also the links between green crimes and other forms of crime, including organised crime's movement into the illegal trade in wildlife or the links between domestic animal abuse and spousal abuse and more serious forms of offending such as serial killing. This series will provide a forum for new works and new ideas in green criminology for both academics and practitioners working in the field, with two primary aims: to provide contemporary theoretical and practice-based analysis of green criminology and environmental issues relating to the development of and enforcement of environmental laws, environmental criminality, policy relating to environmental harms and harms committed against non-human animals and situating environmental harms within the context of wider social harms; and to explore and debate new contemporary issues in green criminology including ecological, environmental and species justice concerns and the better integration of a green criminological approach within mainstream criminal justice. The series will reflect the range and depth of high-quality research and scholarship in this burgeoning area, combining contributions from established scholars wishing to explore new topics and recent entrants who are breaking new ground.

# Acknowledgements

This book reflects ongoing work in the field of green criminology and contemporary debates around environmental issues.

We would like to thank the contributors for their willingness to be involved in this book, for being generous with their time and for their patience and flexibility as the book passed through various editorial and production stages. For those contributors for whom this book is their first dip into the world of academic publishing, we appreciate how daunting this may be. As such, we are grateful to contributors for responding to the review process and for the considerable development work that went into their chapters. We thank all the participants at the ESRC Green Criminology Conference held at London South Bank University in 2014 (whether or not they have provided chapters for this book). The enthusiasm of scholars and practitioners presenting at that conference provided the initial impetus for creating a publication to bring their excellent work to a wider audience.

We would also like to thank Julia Willan and Dominic Walker and the production team at Palgrave Macmillan for their support, professionalism and patience as our planned schedule for completing this book slipped more than once.

Finally, we wish to thank our families and colleagues for their support. For Matthew: I would like to thank my colleague, Duncan French, for numerous discussions on the interaction between environmental law and

criminological enquiry. For Angus: I am grateful to Diane Ryland, my research partner on animal welfare law, whose enthusiasm contributes greatly to developing this area of my work. For Gary: I am grateful to Joanna F. Hill for her briefings on poaching literature and ecological sciences which helped with reviewing submissions to this book.

# Contents

<b>1</b>	<b>The Geography of Environmental Crime</b>	<b>1</b>
	<i>Matthew Hall, Angus Nurse, Gary R. Potter, and Tanya Wyatt</i>	
<b>Part I</b>	<b>Perspectives on Conservation Crimes</b>	<b>11</b>
<b>2</b>	<b>Poaching, Trade, and Consumption of Tiger Parts in the Bangladesh Sundarbans</b>	<b>13</b>
	<i>Samia Saif and Douglas Craig MacMillan</i>	
<b>3</b>	<b>Radical Environmentalism and the Role of Nature</b>	<b>33</b>
	<i>John Cianchi</i>	
<b>4</b>	<b>Be Afraid, Be Very Afraid of ... the Environmental Activist? Ideological War, Coercive Justice, and Orwellian Dystopia</b>	<b>59</b>
	<i>Aurelie Sauvart, Wendy Fitzgibbon, and Angus Nurse</i>	

<b>Part II Crime Prevention and Detection</b>	89
<b>5 Tackling Illegal Wildlife Trade by Improving Traceability: A Case Study of the Potential for Stable Isotope Analysis</b> <i>Amy Hinsley, Emily King, and Pablo Sinovas</i>	91
<b>6 ‘Do Some Anti-Poaching, Kill Some Bad Guys, and Do Some Good’: Manhunting, Accumulation, and Pacification in African Conservation</b> <i>Bill McClanahan and Tyler Wall</i>	121
<b>7 Keeping the Horn on the Rhino: A Study of Balule Nature Reserve</b> <i>Elisa Reuter and Lieselot Bisschop</i>	149
<b>Part III Critical Perspectives on Policy and Enforcement</b>	187
<b>8 Enforcement and Professional Constructions of Environmental Crime in Finland</b> <i>Iina Sahramäki</i>	189
<b>9 ‘I Don’t See Myself as a Criminal’: Motivation and Neutralization of Illegal Hunting by Swedish Norrland Hunters</b> <i>Emil Rytterstedt</i>	217

Table 7.2	Summary of Situational Prevention Techniques	164

## Notes on Contributors

**Lieselot Bisschop** is a postdoctoral research fellow of the Research Foundation Flanders (Belgium) and an assistant professor at Erasmus University Rotterdam (the Netherlands). She also works as an assistant editor for the *European Journal of Policing Studies*. She previously worked as an assistant professor at John Jay College of Criminal Justice (USA) and as a researcher at Ghent University (Belgium). Her research interests are environmental governance (e.g. waste industry, oil and gas sector, timber trade), waste and the informal economy, crimes of the powerful and ivory and rhino horn trade, among others. In 2015, she published the book *Governance of the Illegal Trade in E-Waste and Tropical Timber: Case Studies on Transnational Environmental Crime*.

**John Cianchi** is a research associate in the School of Social Sciences, University of Tasmania, Australia, where he completed a PhD in environmental sociology and a Masters of Criminology and Corrections. His doctoral research, which informed his chapter, arose from his interest in the transformative aspects of nature–human relationships, stemming from many years as an outdoor educator and adventurer. Cianchi has also enjoyed a rewarding career in corrections and criminal justice as an adventure-based counsellor, case manager and senior administrator.

**Wendy Fitzgibbon** is Professor of Criminology at London Metropolitan University, UK. She worked as a probation officer for a number of years before becoming an academic in 2003. She has undertaken research in risk assessment, working with dangerous offenders, mentally disordered offenders, penology and

probation/social work. Her research has been widely published in a number of journals, edited collections and books including a NAPO Monograph (2004) entitled *Pre-emptive Criminalisation: Risk Control and Alternative Futures*. Her book entitled *Probation and Social Work on Trial: Violent Offenders and Child Abusers* (Palgrave Macmillan) was published in 2011. She is the chairperson and founder of the London Practitioner Forum. She is currently involved in a funded European Network examining offenders' experiences of supervision. Her most recent research uses the innovative method of Photovoice to explore offenders' perceptions of probation and the criminal justice system. She has also been commissioned to co-author a new book on Privatisation and Power: Towards the Private State.

**Matthew Hall** is Professor of Law and Criminal Justice and Director of Research at the University of Lincoln School of Law. He has been interviewed on behalf of the European Commission as an expert contributor in the field of victimology to assist the development of a new directive on victims' rights and has also advised the South African Department of Justice and Constitutional Development concerning a review of South Africa's Victim Empowerment Scheme. More recently, Matthew has pioneered research on environmental victimisation and the application of environmental justice principles in the criminal justice system at the national and international levels.

**Amy Hinsley** has over 8 years' experience in both research and practice on issues related to wildlife trade and botanical conservation. She has a BSc in natural sciences, an MSc in conservation management and a PhD that focused on characterising the structure and function of wildlife trade networks, with a particular focus on orchids. She has worked at UNEP-WCMC since 2015 on issues relating to wildlife trade and policy, including a project on wildlife trade traceability in Ecuador.

**Emily King's** experience includes research on issues related to the sustainable use of wildlife, such as the use of bushmeat in rural Zambian communities. She holds a BSc in ecology and an MSc in conservation science. Emily has worked with UNEP-WCMC since 2015 and on projects for the CITES Secretariat, the European Commission and various governments; her work has included contributing to a project to improve the traceability of wildlife trade in Ecuador.

**Douglas MacMillan** is Professor of Biodiversity Economics at the Durrell Institute of Conservation and Ecology, School of Anthropology and Conservation, University of Kent. His research focuses on developing and assess-
